Pharmacist Objectives

- Discuss the opioid overdose and addiction epidemic in review of national statistics and statistics for Rhode Island
- Describe FDA approved medication assisted treatment for opioid use disorder
- Explain the role of the pharmacist in naloxone distribution to help to prevent opioid overdose
- List the most common immunosuppressant medications utilized in the post-transplant regimen and explain the rationale for switching to agents less often used
- Explain the role of the pharmacist when counseling patients prescribed generic immunosuppressants and new extended- release formulations of tacrolimus
- Describe the differences in the treatment of influenza in the immunosuppressed kidney transplant patient vs. a non-immunocompromised patient
- Explain current guidelines and recommendations for the vaccination of kidney transplant recipients
- List the types of vaccines that are contraindicated, discuss the rationale, and explain how to counsel patients and caregivers on the appropriate use of vaccines
- Explain how prescription and non-prescription medications affect hemodynamics
- Identify patients at risk for acute kidney injury (AKI) and provide counseling for these patients
- State the pharmacokinetic parameters that are altered in chronic kidney disease
- Describe approaches for pharmacists to effectively manage medications for patients with kidney disease
- Explain the overall process for detection, analysis, response, and improvement of discovered medication errors.
- Explain the principles of Just Culture and its relation to patient safety and quality improvement opportunities within pharmacy practice.
- Describe an appropriate response and apology to a patient or patient's family regarding a medication error.
- Discuss the impact that high deductible plans and the Medicare coverage gap can have on adherence rates.
- Describe programs/services designed to help patients with financial barriers to care.
- Explain how to prescreen patients and refer eligible patients to programs such as Medicare extra help, RIPAE and other assistance programs.

Pharmacy Technician Objectives

- At the completion of this activity, the pharmacy technician will be able to: Discuss the opioid overdose and addiction epidemic in review of national statistics and statistics for Rhode Island
- Describe FDA approved medication assisted treatment for opioid use disorder
- Explain the role of the pharmacy technician in naloxone distribution to help to prevent opioid overdose
- List the most common immunosuppressant medications utilized in the post-transplant regimen and explain the rationale for switching to agents less often used
- Explain current guidelines and recommendations for the vaccination of kidney transplant recipients
- Explain how prescription and non-prescription medications affect hemodynamics
- Identify patients at risk for acute kidney injury (AKI) and when to refer patients to pharmacist for additional counseling
- Explain the overall process for detection, analysis, response, and improvement of discovered medication errors.
- Explain the principles of Just Culture and its relation to patient safety and quality improvement opportunities within pharmacy practice
- Discuss the impact that high deductible plans and the Medicare coverage gap can have on adherence rates.
- Describe programs/services designed to help patients with financial barriers to care.
- Explain how to prescreen patients and refer eligible patients to programs such as Medicare extra help, RIPAE and other assistance programs.

CONTINUING PHARMACY EDUCATION INFORMATION

The University of Rhode Island, College of Pharmacy, is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. Participation and completion of online evaluations and self-assessment tools at the conclusion of the program are required to earn credit. This is a knowledge-based learning activity. This learning activity provides 5.0 contact hours (0.5 CEUs) of continuing pharmacy education credit for pharmacists and pharmacy technicians. Activity release date: **May 10, 2017.**
